

From Necessity to Invention: Help Create the Future

From landing a man on the moon to introducing the Boeing 737 Dreamliner, the **plastics industry** has played a pivotal role in shaping history.

Here's Why You Should Join the **Plastics Industry** as We Work to Invent the Future:

Work in the Crossroads of Innovation and Job Growth

The plastics industry is the third largest manufacturing industry, which employs **940,000 people in the U.S.** and has a rich heritage of hiring creative, innovative, critical thinkers. Manufacturing as a career choice offers people competitive salaries with great potential for job growth, as well as the chance to create something physical they can point to and say, **"I made that."**

Be a Global Leader in Solving Some of the World's Most Pressing Issues

Today, the plastics industry is working to tackle some of the world's most pressing issues such as preserving the **environment**, **improving health**, and **building on current technology**.

Explore a Variety of Job Opportunities Across All Fields

We are looking for ambitious and **innovative engineers** to push us to new heights, **passionate advocates** to represent the industry at all levels of the policy-making process and dedicated **communications professionals** to represent the industry and deliver our message to the world. We believe that skills you can bring to the table are valuable, especially when paired with passion.

Collaborate With a Network of Talented Professionals

We understand the best solutions come when teams are made up of diverse perspectives. You will have the opportunity to meet and **learn from some of the best visionaries** in their respective fields, as well as share your own expertise.

The Rewards are Limitless

The plastics industry offers many **opportunities to travel**, the ability to **create products** that are used in a variety of impactful ways, and opportunities to give back to the community. Many plastics companies are community champions who dedicate resources to corporate social responsibility opportunities for their employees, whether it's dedicated company time to participate in volunteer work or the opportunity to **educate young children about careers in STEM**.
